

# County Line Antique Tractor Club

Revised 01/29/2023

## Steel Wheel Pull Rules

1. Contestants enter at their own risk. County Line Antique Tractor Club will not be held responsible for any injuries, accidents or property damage. Judges reserve the right to stop any contestant operating in an unsafe or dangerous manner. Judges reserve discretion on all rules stated and not stated. No one is allowed on the track except the puller and track workers.
2. Hitch will be no higher than 16" with spades in the ground. Hitch must be behind the radius of the wheel face if the tractor does not have wheelie bars. If the tractor does have wheelie bars, the hitch can be no less than 18" from the center of the rear axle to the hook point and no higher than 16" with spades in the ground. Wheelie bars must be behind the radius of the wheel, strong enough to support the weight of the tractor, pads should hit the ground before the hook and the wheelie bars should be independent of the hitch.
3. Weights must not extend more than 36" back from the center of the rear axle and not more than 11 feet forward from the center of the rear axle. No weights shall interfere with hooking or unhooking the tractor.
